## SUMMARY

Software Engineer with experience building analytics platforms, observability systems, and distributed backend services using React.js, GraphQL, Node.js, Java Spring Boot, and OpenTelemetry. Skilled in CI/CD automation, telemetry pipelines, and scalable microservices architecture.

## EDUCATION

|                                                              |                       |
|--------------------------------------------------------------|-----------------------|
| <b>Indian Institute of Information Technology, Allahabad</b> | <b>Marks: 8.53/10</b> |
| Bachelor of Technology in Information Technology             | 07/2021 – 06/2025     |

## WORK EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                   |
